

REQUEST FOR INFORMATION (RFI)

Requested Team McMaster University **Date** August 30th, 2023

Competition GNCTR 2024 **RFI No.** RFI_007

ISSUE DESCRIPTION AND REASON FOR RFI

Regarding the construction of our toboggan, our plan is to weld Aluminium (TIG) on site at McMaster. We were wondering if this will require a TIG ticket/Aluminium welding ticket? We provided a MIG certificate last year for welding our steel on site and were wondering if we will require the same for TIG?

RESPONSE

Yes, a ticket will be required. Testing will be required such as Non-Destructive Testing (NDT) to provide verification, as per Rule 7.5.4.
